Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

1. Claim 1 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.
2. Applicant's election with traverse of invention group II, claims 2-4, and the compound of example 58 and prostate cancer as the elected species in Paper No. 9 is acknowledged. The traversal is on the ground(s) that search of all the invention is not an undue burden since both inventions are in the same class and subclass. This is not found persuasive because search of group II, is not required for the search of group I. Further, note that the search is not limited to patent literature.

The requirement is still deemed proper and is therefore made FINAL.

The elected species, i.e., employing compound of example 58 for treating prostate cancer was found allowable, the search has been extended to non-elected compounds. *The claims have been examined insofar as they read on searched compounds.*

Note the examiner was unable to locate the references submitted with the IDSs. However, all the patent literatures have been retrieved and considered. Applicants are advised to resubmit all the non-patent literatures recited in the IDSs.

Claim Rejections 35 U.S.C. 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1617

4. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, the claims recite "preferably" followed by narrower range within claims.

6. Regarding claims 2 and 3, the phrase "(e.g.,)" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections 35 U.S.C. 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1617

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al. (WO 99/32463, IDS).

9. Miller et al. teach method of treating cytokine mediated diseases and proteolytic enzyme mediated diseases by administering a substituted urea to the patient, wherein, the substituted urea may have fused succinimide herein as the substituents. The diseases including advanced cancer, inflammation and cancer. See, particularly, the abstract, pages 6-11.

10. Miller et al. do not teaches expressly to employ a fused succinimide substituted urea for treating prostate cancer.

11. However, it would have been prima facie obvious to a person of ordinary skill in the art, at the time the claimed the invention was made, to employ a fused succinimide substituted urea for treating prostate cancer.

12. A person of ordinary skill in the art would have been motivated employ a fused succinimide substituted urea for treating prostate cancer because fused succinimide substituted ureas are known generally to be useful for treating cancer. An anticancer drug having a broad anticancer spectrum would have been reasonable expected to be useful against prostate cancer.
